

I believe that concentration of media ownership by a very few large organizations is more dangerous to the future of the U.S. than Global Terrorism, Weapons of Mass Destruction, Iraq, etc. combined.

One only has to look at the incredible LACK of reporting by media companies of rulings by the FCC that affect media ownership to know that media companies exert tremendous influence both by LIMITING what information is passed on to consumers!!

Effectively, large media companies exercise their ability to filter information from the public when it suits their interests! This bodes ill for democracy as we know it. Democracy depends on the free flow of information.

Please limit media concentration.

Also, please REQUIRE that FCC rulings affecting media to be publicized. If necessary, require large public notices in print and links on the main page of major network and media websites.

Thank you.
